SUMMARY

A skilled and adaptable Software Engineer with 3.5+ years of experience in backend development, specializing in Python, SQL, and RabbitMQ. Proficient in MongoDB, Elasticsearch, Redis, and real-time communication technologies like WebSockets. Possesses knowledge of AWS server management and cloud infrastructure. Holds a Bachelor's degree in Computer Applications and has a proven track record of leading teams, implementing innovative solutions, and delivering efficient software in a corporate environment.

KEY SKILLS

- Programming: Python, MySQL
 - Databases: MongoDB, Elasticsearch, Redis, Postgres, Dynamo DB
 - Frameworks: Flask(API development), Fastapi
 - Messaging Systems: RabbitMQ, AWS SQS
 - Real Time Communication: WebSockets
 - Cloud Service: AWS (S3, server management)
 - Other Skills: Team Collaboration, Microsoft Office
 - Containerization & Orchestration: Docker
 - Architecture and Design: Monolithic and Microservice
-

EDUCATION

Bachelor in Computer Application

Jul 2016- Jun 2019

Ewing Christian College, Prayagraj

Percentage: 60%

PROFESSIONAL EXPERIENCE

SR. Software Engineer -- Backend

June 2025 – Jan 2026

Capital Numbers Infotech PVT LTD | Gurgaon

- Design and develop RESTful APIs using Python to support various application functionalities
- Developed the Synthetic Indices Data Platform backend using Python (FastAPI), focusing on building scalable RESTful APIs and WebSocket services for real-time financial data delivery.
- Implemented real-time price generation logic using dynamic Python-based formulas with customizable parameters (volatility, drift, randomness) to simulate realistic market behavior.
- Designed and integrated FIX 4.4 protocol support to enable admin assign to index and receive market data seamlessly alongside WebSocket-based connections.
- Integrated AWS SQS Pub/Sub to handle large datasets and provide brokers with the ability to download historical data based on custom filters and timeframes.
- Implemented security measures such as TLS encryption for all connections and token-based authentication to maintain compliance and data integrity.
- Collaborate with cross-functional teams to deliver comprehensive solutions
- Managed multiple services using Docker Compose, with separate services for the web app, migration tasks, and background workers, enabling efficient communication and data flow between components.

Suraj Kesarwani

Software engineer

Software engineer –Backend

Sept 2022 – Feb 2025

Plotch.ai - Craftsvilla | Mumbai

- Develop 20 APIs and scripts using Python and Flask to meet project requirements.
- Successfully integrated 10 third-party APIs into the existing flow, enhancing functionality and expanding the platform's capabilities for seamless data exchange and enhanced user experience.
- Effectively used Gmail and Google Calendar APIs to streamline email management and automate calendar events, resulting in a 30% reduction in manual tasks and a 20% increase in productivity for the team.
- Provided innovative solutions to over 50 problem statements, resulting in a 95% success rate in resolving issues and improving system performance. These solutions led to a 40% reduction in errors and a 25% increase in overall efficiency.
- Analyze and process large-scale data sets like NoSQL (MongoDB) and SQL databases. Implemented efficient data retrieval and querying strategies, resulting in a 50% reduction in query response time and a 30% increase in data processing speed. These improvements enabled faster decision-making and enhanced data-driven insights for informed business decisions.
- Leveraged AWS for file management in S3 Bucket, efficiently storing and accessing files with a 99% uptime, ensuring reliable data availability and seamless scalability. Additionally, utilized Elasticsearch (ES) for data storage and querying, achieving an average search response time of under 100 milliseconds for a database of 1 million records, enabling quick and efficient data retrieval for analysis and reporting purposes.
- Utilized RabbitMQ for messaging, implementing systems to push and consume payloads effectively, ensuring reliable data transfer and processing.
- Demonstrated adaptability and proficiency in learning new concepts, quickly acquiring new skills and applying them to meet evolving project requirements.

Software Tester

july 2022 – Sept 2022

Plotch.ai – Craftsvilla | Mumbai

- Developed and executed detailed test cases to validate new features and ensure alignment with requirements.
- Performed thorough flow testing to verify the integration and functionality of various software components.
- Communicated software testing results to stakeholders through clear, concise reports, and provided recommendations for enhancements.
- Conducted exploratory and usability testing to uncover and address potential bugs and user experience issues before production release.
- Collaborated with development teams to diagnose and resolve defects, facilitating faster issue resolution and improved software quality.
- Contributed to the refinement of software testing methodologies by participating in regular reviews and feedback sessions.
- Developed and maintained comprehensive test documentation, including test plans, test cases, and bug reports.
- Assisted in training and mentoring junior testers, sharing best practices and promoting adherence to testing standards.

Suraj Kesarwani

Software engineer

Business Development Associate
Aegis | Noida

Nov 2019 – July 2022

- Assisted sellers in optimizing their presence on Flipkart by providing data-driven insights and strategies for growth. Developed cost-effective solutions, including active filters, passive filters, and hybrid filters.
- Delivered tailored services to help sellers expand their businesses and increase sales through effective platform utilization.
- Presented new business ideas and growth strategies to sellers, enhancing their market competitiveness.
- Conducted regular sessions with sellers to understand their challenges, providing actionable solutions and support.
- Analyzed sales data and marketplace trends to identify areas for improvement, helping sellers maximize product visibility and sales.
- Trained and mentored new sellers on platform policies, listing optimization, inventory management, and pricing strategies.

ACHIEVEMENTS

- Effectively debugged client issues, achieving a 99% resolution rate, which significantly contributed to meeting and exceeding project goals and client expectations.
 - Designed and implemented a monitoring tool that reduced downtime by 15% and improved system reliability
 - Reduced query response times by 50% and enhanced data-driven decision-making through efficient database strategies.
 - Implemented innovative solutions to over 50 problem statements, achieving a 95% success rate and a 40% reduction in errors.
-
